

James "LJ" Nesbit is the technical sales manager covering Texas and Southwest U.S.

Collaborative Aggregates LLC based in Wilmington, MA welcomes James "LJ" Nesbit to the staff in a technical sales role. The company is formed by James Babcock, ceo in late 2014 to manufacture, market and sell construction products. Collaborative Aggregates LLC exists exclusively to commercialize the construction products and infrastructure materials formulated by the Warner Babcock Institute for Green Chemistry. The first product to be commercialized is Delta S, a plant based liquid used as an asphalt rejuvenator and warm mix asphalt chemistry. Delta S launched in June 2015.

James "LJ" Nesbit joins the sales team to introduce the company, the Delta S product and the Green Chemistry initiative to the Southwest U.S. with a focus on Texas. LJ reports to Bart Rowland, v.p. sales in his technical sales management role. James Nesbit comes to Collaborative Aggregates LLC with over 10 years experience in industrial supply account sales and sales management experience.

A graduate of Texas Tech University in Lubbock, "LJ" is also a graduate of the National Outdoor Leadership School. James Nesbit is an advocate for the environmental conservation of natural resources causing his professional interest in construction products developed utilizing Green Chemistry technology. James is operating from an office at home in Metro Dallas-Fort Worth.
